### ASTOR DYNAMIC ALLOCATION FUND

#### **PORTFOLIO REVIEW (Unaudited)**

January 31, 2024

Average Annual Total Return through January 31, 2024\*, as compared to its benchmarks:

	Six Months	One Year	Five Year	Ten Year	Inception (1)	Inception (2)	Inception (3)
Astor Dynamic Allocation Fund - Class A Shares	3.74%	7.88%	4.63%	5.05%	N/A	N/A	5.05%
Astor Dynamic Allocation Fund - Class A Shares With Load	-1.20%	2.76%	3.62%	4.55%	N/A	N/A	4.64%
Astor Dynamic Allocation Fund - Class C Shares	3.38%	7.05%	3.84%	4.27%	N/A	3.58%	N/A
Astor Dynamic Allocation Fund - Class I Shares	3.87%	8.14%	4.87%	5.31%	4.62%	N/A	N/A
S&P 500 Total Return Index **	6.43%	20.82%	14.30%	12.62%	13.14%	13.08%	13.98%
60/40 S&P 500/Bloomberg U.S. Aggregate Bond Index ***	5.15%	13.07%	9.06%	8.35%	8.99%	8.92%	9.16%

\* The performance data quoted is historical. Past performance is no guarantee of future results. Current performance may be higher or lower than the performance data quoted. The principal value and investment return of an investment will fluctuate so that your shares, when redeemed, may be worth more or less than their original cost. The returns shown do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemptions of Fund shares. The Fund's total annual operating expenses, including underlying funds, are 1.82%, 2.57%, and 1.57% for Class A, Class C, and Class I respectively, per the most recent prospectus. After fee waivers and/or reimbursements, the Fund's net operating expense, including underlying funds, is 1.55%, 2.30%, and 1.30% for Class A, Class C, and Class I shares, respectively. Pursuant to a written contract (the "Waiver Agreement"), the advisor has agreed, at least until November 30, 2024, to waive a portion of its advisory fee and has agreed to reimburse the Fund for other expenses to the extent necessary so that the total expenses incurred by the Fund (excluding any front-end or contingent deferred loads; brokerage fees and commissions; acquired fund fees and expenses; borrowing costs (such as interest and dividend expense on securities sold short); taxes; and extraordinary expenses, such as litigation expenses (which may include indemnification of Fund officers and Trustees, contractual indemnification of Fund service providers, other than the advisor)) do not exceed 1.40%, 2.15%, and 1.15% for Class A, Class I shares, respectively. Class A shares are subject to a maximum sales charge of 4.75% of the purchase price. Performance figures for periods greater than one year are annualized. For performance information current to the most recent month-end, please call 1-877-738-0333.

\*\* The S&P 500 Total Return Index is an unmanaged composite of 500 large capitalization companies. This Index is widely used by professional investors as a performance benchmark for large-cap stocks. You cannot invest directly in an index and unmanaged index returns do not reflect any fees, expenses or sales charges.

\*\*\* The 60/40 S&P 500/Bloomberg U.S. Aggregate Bond Index is compromised of 60% of the S&P 500 Total Return Index and 40% of the Bloomberg U.S. Aggregate Bond Index. The Blended Index rebalances its weightings on a monthly frequency. You cannot invest directly in an index and unmanaged index returns do not reflect any fees, expenses or sales charges.

(1) Class I inception date is October 19, 2009.

(2) Class C inception date is March 12, 2010.

(3) Class A inception date is November 30, 2011.

The Fund's holdings by asset class, as of Janauary 31, 2024 are as follows:

Asset Classes	% of Net Assets
Exchange Traded Funds - Equity	50.5%
Exchange Traded Funds - Fixed Income	48.1%
Short-Term Investments	1.5%
Liabilities In Excess of Other Assets	-0.1%
Total	100.0%

Please refer to the Schedule of Investments in this semi-annual report for a detailed listing of the Fund's holdings.

#### 1. ORGANIZATION

The Astor Dynamic Allocation Fund, the Astor Sector Allocation Fund, and Astor Macro Alternative Fund (each a "Fund" or collectively the "Funds") are each a diversified series of shares of beneficial interest of Northern Lights Fund Trust (the "Trust"), a statutory trust organized under the laws of the State of Delaware on January 19, 2005, and registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as an open-end management investment company. The Astor Dynamic Allocation Fund seeks total return through a combination of capital appreciation and income. The Astor Sector Allocation Fund seeks capital appreciation. The Astor Macro Alternative Fund seeks to provide positive returns over a market cycle regardless of market conditions or general market direction. Each Fund is a "fund of funds", in that the funds will generally invest in other investment companies. The Astor Dynamic Allocation Fund commenced operations on October 19, 2009. The Astor Sector Allocation Fund commenced operations on November 30, 2011. The Astor Macro Alternative Fund commenced operations on June 22, 2015.

The Astor Dynamic Allocation Fund currently offers Class A, Class C, and Class I shares. Class C and Class I shares are offered at net asset value. Class A shares are offered at net asset value plus a maximum sales charge of 4.75%. The Astor Sector Allocation Fund currently offers Class A, Class C, and Class I shares. Class C and Class I shares are offered at net asset value and Class A shares are offered at net asset value plus a maximum sales charge of 4.75%. The Astor Macro Alternative Fund currently offers Class A and Class I shares. Class I shares are offered at net asset value and Class A shares are offered at net asset value plus a maximum sales charge of 4.75%. The Astor Macro Alternative Fund currently offers Class A and Class I shares. Class I shares are offered at net asset value and Class A shares are offered at net asset value plus a maximum sales charge of 4.75%. Each class represents an interest in the same assets of the respective Fund and classes of a Fund are identical except for differences in their sales charge structures and ongoing service and distribution charges. All classes of shares of a Fund have equal voting privileges except that each class has exclusive voting rights with respect to its service and/or distribution plans. Each Fund's income, expenses (other than class specific distribution fees), and realized and unrealized gains and losses are allocated proportionately each day based upon the relative net assets of each class.

The consolidated financial statements of the Astor Macro Alternative Fund include the Astor Macro Alternative Fund and its wholly owned subsidiary AMA Fund Limited ("AMA"). AMA commenced operations on June 22, 2015 and is incorporated in the Cayman Islands as an exempted investment company with limited liability.

#### 2. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies followed by the Funds in preparation of their financial statements. The policies are in conformity with U.S. generally accepted accounting principles ("GAAP"). The preparation of the financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses for the period. Actual results could differ from those estimates. Each Fund is an investment company and accordingly follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board ("FASB") Accounting Standards Codification Topic 946 "Financial Services Investment Companies" including Accounting Standards Update ("ASU") 2013-08.

**Securities Valuation** - Securities listed on an exchange are valued at the last reported sale price at the close of the regular trading session of the exchange on the business day the value is being determined or, in the case of securities listed on NASDAQ, at the NASDAQ Official Closing Price. In the absence of a sale, such securities shall be valued at the mean between the current bid and ask prices on the day of valuation. Debt securities (other than short-term obligations) are valued each day by an independent pricing service approved by the Trust's Board of Trustees (the "Board") using methods which include current market quotations from a major market maker in the securities and based on methods which include the consideration of yields or prices of securities of comparable quality, coupon, maturity and type. The independent pricing service does not distinguish between smaller-sized

bond positions known as "odd lots" and larger institutional-sized bond positions known as "round lots". A Fund may fair value a particular bond if the advisor does not believe that the round lot value provided by the independent pricing service reflects fair value of the Fund's holding. Short-term debt obligations with remaining maturities in excess of sixty days are valued at current market prices by an independent pricing service approved by the Board. Short-term debt obligations having sixty days or less remaining until maturity, at time of purchase, may be valued at amortized cost.

The Fund may hold securities, such as private investments, interests in commodity pools, other non-traded securities or temporarily illiquid securities, for which market quotations are not readily available or are determined to be unreliable. These securities are valued using the "fair value" procedures approved by the Board. The Board designated the adviser as its valuation designee (the "Valuation Designee") to execute these procedures. The Board may also enlist third party consultants such a valuation specialist at a public accounting firm, valuation consultant or financial officer of a security issuer on an as-needed basis to assist the Valuation Designee in determining a security-specific fair value. The Board is responsible for reviewing and approving fair value methodologies utilized by the Valuation Designee, approval of which shall be based upon whether the Valuation Designee followed the valuation procedures established by the Board.

Fair Valuation Process – The applicable investments are valued by the Valuation Designee pursuant to valuation procedures established by the Board. For example, fair value determinations are required for the following securities: (i) securities for which market quotations are insufficient or not readily available on a particular business day (including securities for which there is a short and temporary lapse in the provision of a price by the regular pricing source); (ii) securities for which, in the judgment of the Valuation Designee, the prices or values available do not represent the fair value of the instrument; factors which may cause the Valuation Designee to make such a judgment include, but are not limited to, the following: only a bid price or an asked price is available; the spread between bid and asked prices is substantial; the frequency of sales; the thinness of the market; the size of reported trades; and actions of the securities markets, such as the suspension or limitation of trading; (iii) securities determined to be illiquid; and (iv) securities with respect to which an event that will affects the value thereof has occurred (a "significant event") since the closing prices were established on the principal exchange on which they are traded, but prior to a Fund's calculation of its net asset value. Specifically, interests in commodity pools or managed futures pools are valued on a daily basis by reference to the closing market prices of each futures contract or other asset held by a pool, as adjusted for pool expenses. Restricted or illiquid securities, such as private investments or non-traded securities are valued based upon the current bid for the security from two or more independent dealers or other parties reasonably familiar with the facts and circumstances of the security (who should take into consideration all relevant factors as may be appropriate under the circumstances). If a current bid from such independent dealers or other independent parties is unavailable, the Valuation Designee shall determine, the fair value of such security using the following factors: (i) the type of security; (ii) the cost at date of purchase; (iii) the size and nature of the Fund's holdings; (iv) the discount from market value of unrestricted securities of the same class at the time of purchase and subsequent thereto; (v) information as to any transactions or offers with respect to the security; (vi) the nature and duration of restrictions on disposition of the security and the existence of any registration rights; (vii) how the yield of the security compares to similar securities of companies of similar or equal creditworthiness; (viii) the level of recent trades of similar or comparable securities; (ix) the liquidity characteristics of the security; (x) current market conditions; and (xi) the market value of any securities into which the security is convertible or exchangeable.

Valuation of Fund of Funds - The Funds may invest in portfolios of open-end or closed-end investment companies (the "Underlying Funds"). The Underlying Funds value securities in their portfolios for which market quotations are readily available at their market values (generally the last reported sale price) and all other securities and assets at their fair value to the methods established by the board of directors of the Underlying Funds. The shares of many closed-end investment companies, after their initial public offering, frequently trade at a price per share, which is different than the net asset value per share. The difference represents a market premium or market discount of such shares. There can be no assurances that the market discount or market premium on shares of any

closed-end investment company purchased by the Funds will not change. Each Fund utilizes various methods to measure the fair value of all of its investments on a recurring basis.

Futures Contracts – The Astor Macro Alternative Fund may purchase or sell futures contracts to gain exposure to, or hedge against, changes in the value of equities, interest rates, foreign currencies, or commodities. Initial margin deposits required upon entering into futures contracts are satisfied by the segregation of specific securities or cash as collateral for the account of the broker (the Fund's agent in acquiring the futures position). During the period the futures contracts are open, changes in the value of the contracts are recognized as unrealized gains or losses by "marking to market" on a daily basis to reflect the market value of the contracts at the end of each day's trading. Variation margin payments are received or made depending upon whether unrealized gains or losses are incurred. When the contracts are closed, the Fund recognizes a realized gain or loss equal to the difference between the proceeds from, or cost of, the closing transaction and the Fund's basis in the contract. If the Fund was unable to liquidate a futures contract and/or enter into an offsetting closing transaction, the Fund would continue to be subject to market risk with respect to the value of the contracts and continue to be required to maintain the margin deposits on the futures contracts. The Fund segregates liquid securities having a value at least equal to the amount of the current obligation under any open futures contract. Risks may exceed amounts recognized in the consolidated statement of assets and liabilities. With futures, there is minimal counterparty credit risk to the Fund since futures are exchange traded and the exchange's clearinghouse, as counterparty to all exchange traded futures, guarantees the futures against default.

GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The three levels of inputs are:

Level 1 – Unadjusted quoted prices in active markets for identical assets and liabilities that the Funds have the ability to access.

Level 2 – Observable inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument in an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3 – Unobservable inputs for the asset or liability, to the extent relevant observable inputs are not available, representing the Funds' own assumptions about the assumptions a market participant would use in valuing the asset or liability, and would be based on the best information available.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3.

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety, is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following tables summarize the inputs used as of January 31, 2024, for the Funds' assets and liabilities measured at fair value:

#### Astor Dynamic Allocation Fund

Assets *	Level 1	Level 2	Level 3		Total
Exchange-Traded Funds	\$ 89,089,920	\$ -	\$	-	\$ 89,089,920
Money Market Fund	1,357,029	-		-	1,357,029
Total	\$ 90,446,949	\$ -	\$	-	\$ 90,446,949

#### Astor Sector Allocation Fund

Assets *	Level 1	Level 2	Level 3		Total
Exchange-Traded Funds	\$ 18,955,705	\$ -	\$	-	\$ 18,955,705
Money Market Fund	370,134	-		-	370,134
Total	\$ 19,325,839	\$ -	\$	-	\$ 19,325,839

#### Astor Macro Alternative Fund

Assets **	Level 1	Level 2	Level 3	Total
Exchange-Traded Funds	\$ 9,929,531	\$ -	\$ -	\$ 9,929,531
Open Futures Contracts ***	13,482	-	-	13,482
Total	\$ 9,943,013	\$ -	\$ -	\$ 9,943,013

The Funds did not hold any Level 2 or 3 securities during the period.

\*Refer to the Schedule of Investments for classification by asset class.

\*\*Refer to the Consolidated Schedule of Investments for classification by asset class.

\*\*\* Includes cumulative net unrealized appreciation on futures contracts open at January 31, 2024.

**Consolidation of Subsidiaries** – The consolidated financial statements of the Astor Macro Alternative Fund include AMA, a wholly-owned and controlled foreign corporation ("CFC").

The Astor Macro Alternative Fund may invest up to 25% of its total assets in the CFC, which acts as an investment vehicle in order to effect certain investments consistent with the Astor Macro Alternative Fund's investment objectives and policies. The Astor Macro Alternative Fund consolidates the results of subsidiaries in which the Astor Macro Alternative Fund holds a controlling economic interest. Controlling economic interest is generally deemed to exist with investment interests comprising greater than 50% of the net asset value of the subsidiary. However, the Astor Macro Alternative Fund may also consider qualitative aspects of control in determining if a controlling economic interest exists. These qualitative control considerations include the nature and organizational structure of the investment, as well as the Astor Macro Alternative Fund's ability to control the circumstances leading to majority ownership. All significant inter-company accounts and transactions have been eliminated in consolidation.

A summary of the net assets of AMA is as follows:

		% of Astor Macro Alternative
Inception Date of	AMA Net Assets at	Fund's Net Assets at
AMA:	January 31, 2024	January 31, 2024
6/22/2015	\$ 1,561,029	13.41%

January 31, 2024

The results from operations of AMA were as follows:

\$ 656,550
 12,553
\$ 669,103
\$

For tax purposes, AMA is an exempted Cayman Islands investment company. AMA has received an undertaking from the government of the Cayman Islands exempting it from all local income, profits, and capital gains taxes. No such taxes are levied in the Cayman Islands at the present time. For U.S. income tax purposes, AMA is a CFC which generates and is allocated no income which is considered effectively connected with U.S. trade or business and as such is not subject to U.S. income tax. However, as a wholly-owned CFC, AMA's net income and capital gain, to the extent of its earnings and profits, will be included each year in the Astor Macro Alternative Fund's investment company taxable income.

In accordance with its investment objectives and through its exposure to the aforementioned managed futures program, the Astor Macro Alternative Fund may have increased or decreased exposure to one or more of the following risk factors defined below:

**Commodity Risk** - Commodity risk relates to the change in value of commodities or commodity indexes as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

**Credit Risk** - Credit risk relates to the ability of the issuer to meet interest and principal payments, or both, as they come due. In general, lower-grade, higher-yield bonds are subject to credit risk to a greater extent than lower-yield, higher-quality bonds.

**Currency Risk** - Foreign exchange rate risk relates to the change in the U.S. dollar value of a security held that is denominated in a foreign currency. The U.S. dollar value of a foreign currency denominated security will decrease as the dollar appreciates against the currency, while the U.S. dollar value will increase as the dollar depreciates against the currency.

**Fixed-Income Risk** - When the Fund invests in fixed-income ETFs that invest in fixed-income securities, the value of your investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of the fixed-income securities owned by the Fund. In general, the market price of debt securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities. Other risk factors impacting fixed-income securities include credit risk, maturity risk, market risk, extension or prepayment risk, illiquid security risks and investment-grade securities risk. These risks could affect the value of a particular investment by the Fund possibly causing the Fund's share price and total return to be reduced and fluctuate more than other types of investments.

**ETF Risk** – Exchange-Traded Funds ("ETFs") are subject to investment advisory fees and other expenses, which will be indirectly paid by the Fund. As a result, your cost of investing in the Fund will be higher than the cost of investing directly in ETFs and may be higher than other mutual funds that invest directly in stocks and bonds. ETFs are listed on national stock exchanges and are traded like stocks listed on an exchange. ETF shares may trade at a discount or a premium in market price if there is a limited market in such shares. ETFs are also subject to brokerage and other trading costs, which could result in greater expenses to the Fund. ETFs may employ leverage, which magnifies the changes in the value of the ETFs. Finally, because the value of ETF shares depends on the demand in the market, the advisor may not be able to liquidate the Fund's holdings at the most optimal time, adversely affecting performance. If the Fund invests a significant portion of its assets in ETFs offered by one ETF

sponsor, the Fund could be exposed to additional risks and losses if the sponsor's ETFs fall out of favor in the marketplace and trading volumes cause the ETF's market prices to decline.

You will indirectly bear fees and expenses charged by the ETFs in addition to the Fund's direct fees and expenses. Additional risks of investing in ETFs are described below:

(a) Strategy Risk. Each ETF is subject to specific risks, depending on the nature of the ETF. These risks could include liquidity risk and sector risk, as well as risks associated with fixed-income securities.

(b) Net Asset Value and Market Price Risk. The market value of the ETF shares may differ from their net asset value. This difference in price may be due to the fact that the supply and demand in the market for ETF shares at any point in time is not always identical to the supply and demand in the market for the underlying basket of securities. Accordingly, there may be times when an ETF share trades at a premium or discount to its net asset value.

(c) Tracking Risk. Investment in the Fund should be made with the understanding that the ETFs in which the Fund invests will not be able to replicate exactly the performance of the indices they track because the total return generated by the securities will be reduced by transaction costs incurred in adjusting the actual balance of the securities. In addition, the ETFs in which the Fund invests will incur expenses not incurred by their applicable indices. Certain securities comprising the indices tracked by the ETFs may, from time to time, temporarily be unavailable, which may further impede the ability to track the applicable indices.

Market Risk. The net asset value of the Fund will fluctuate based on changes in the value of the individual (d) securities in which the Fund invests. The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, climate-change or climate-related events, pandemics, epidemics, terrorism, international conflicts, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years may result in market volatility and may have long term effects on both the U.S. and global financial markets. The novel coronavirus (COVID-19) global pandemic and the aggressive responses taken by many governments, including closing borders, restricting international and domestic travel, and the imposition of prolonged quarantines or similar restrictions, as well as the forced or voluntary closure of, or operational changes to, many retail and other businesses, had negative impacts, and in many cases severe negative impacts, on markets worldwide. It is not known how long such impacts, or any future impacts of other significant events described above, will or would last, but there could be a prolonged period of global economic slowdown, which may impact your Fund investment.

Market and Geopolitical Risk- The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, climate-change or climate-related events, pandemics, epidemics, terrorism, international conflicts, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years, such as terrorist attacks around the world, natural disasters, social and political discord or debt crises and downgrades, among others, may result in market volatility and may have long term effects on both the U.S. and global financial markets. It is difficult to predict when similar events affecting the U.S. or global financial markets may occur, the effects that such events may have and the duration of those effects. Any such event(s) could have a significant adverse impact on the value and risk profile of the Fund. The novel coronavirus (COVID-19) global pandemic and the aggressive responses taken by many governments, including closing borders, restricting international and domestic travel, and the imposition of prolonged quarantines or similar restrictions, as well as the forced or voluntary closure of, or operational changes to, many retail and other businesses, had negative impacts, and in many cases severe negative impacts, on markets worldwide. It is not known how long such

impacts, or any future impacts of other significant events described above, will or would last, but there could be a prolonged period of global economic slowdown, which may impact your investment. Therefore, the Fund could lose money over short periods due to short-term market movements and over longer periods during more prolonged market downturns. During a general market downturn, multiple asset classes may be negatively affected. Changes in market conditions and interest rates can have the same impact on all types of securities and instruments. In times of severe market disruptions, you could lose your entire investment.

**Security Transactions and Related Income** – Security transactions are accounted for on the trade date. Interest income is recognized on an accrual basis. Discounts are accreted and premiums are amortized on securities purchased over the lives of the respective securities using the effective interest method. Dividend income is recorded on the ex-dividend date. Realized gains or losses from sales of securities are determined by comparing the identified cost of the security lot sold with the net sales proceeds.

**Dividends and Distributions to Shareholders** – Dividends from net investment income, if any, are declared and paid quarterly for the Astor Dynamic Allocation Fund, the Astor Sector Allocation Fund, and the Astor Macro Alternative Fund. Distributable net realized capital gains, if any, are declared and distributed annually. Dividends from net investment income and distributions from net realized gains are determined in accordance with federal income tax regulations, which may differ from GAAP. These "book/tax" differences are considered either temporary (i.e., deferred losses, capital loss carry forwards) or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the composition of net assets based on their federal tax-basis treatment; temporary differences do not require reclassification. Dividends and distributions to shareholders are recorded on the ex-dividend date.

**Expenses** – Expenses of the Trust that are directly identifiable to a specific Fund are charged to that Fund. Expenses, which are not readily identifiable to a specific Fund, are allocated in such a manner as deemed equitable, taking into consideration the nature and type of expense and the relative sizes of the Funds in the Trust.

**Federal Income Taxes** – Each Fund complies with the requirements of the Internal Revenue Code applicable to regulated investment companies and intends to distribute all of its taxable income to its shareholders. Therefore, no provision for federal income tax is required. The Funds recognize the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. Management has analyzed the Fund's tax positions and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on returns filed for open tax years July 31, 2021 – July 31, 2023 or expected to be taken in the Funds' July 31, 2024 tax returns. The Funds recognize interest and penalties, if any, related to unrecognized tax benefits as income tax expense in the Statements of Operations. During the year, the Funds did not incur any interest or penalties. The Funds identified their major tax jurisdictions as U.S. federal, Ohio and foreign jurisdictions where the Funds make significant investments; however, the Funds are not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months.

**Exchange Traded Funds** - The Funds may invest in ETFs. ETFs are a type of fund bought and sold on a securities exchange. An ETF trades like common stock and represents a fixed portfolio of securities. The risks of owning an ETF generally reflect the risks of owning the underlying securities they are designed to track, although the lack of liquidity on an ETF could result in it being more volatile. Additionally, ETFs have fees and expenses that reduce their value.

# Impact of Derivatives on the Consolidated Statement of Assets and Liabilities and Consolidated Statement of Operations

The following is a summary of the location of derivative investments on the Astor Macro Alternative Fund's Consolidated Statement of Assets and Liabilities as of January 31, 2024.

Contract Type/Primary Risk Exposure	Balance Sheet Location	Unrealized Appreciation (Depreciation)
	Net unrealized appreciation on futures	
Commodity Risk	contracts	\$ 19,505
	Net unrealized appreciation on futures	
Foreign Exchange Rate Risk	contracts	(14,350)
	Net unrealized appreciation on futures	
Interest Risk	contracts	8,327
Total		\$ 13,482

The following is a summary of the location of derivative investments on the Astor Macro Alternative Fund's Consolidated Statement of Operations for the six months ended January 31, 2024:

			Realized and Unrealized Gain
		Location of Gain (Loss) on Derivatives	(Loss) on Derivatives recognized
Derivative Investment Type	Primary Risk Exposure	recognized in income	in income
		Net realized gain from futures	
Futures Contracts	Commodity Risk	transactions	\$ 226,881
		Net realized loss from futures	
	Equity Risk	transactions	(15,513)
		Net realized gain from futures	
	Foreign Exchange Rate Risk	transactions	74,201
		Net realized gain from futures	
	Interest Risk	transactions	379,436
Total			\$ 665,005
		Net change in unrealized appreciation	
Futures Contracts	Commodity Risk	(depreciation) on futures contracts	\$ 61,715
		Net change in unrealized appreciation	
	Foreign Exchange Rate Risk	(depreciation) on futures contracts	(18,149)
		Net change in unrealized appreciation	
	Interest Risk	(depreciation) on futures contracts	(30,668)
Total			\$ 12,898

The amounts of realized and changes in unrealized gains and losses on derivative instruments during the period as disclosed in the Consolidated Statement of Operations serve as indicators of the volume of derivative activity for the Astor Macro Alternative Fund.

#### **Offsetting of Financial Assets and Derivative Assets**

The Astor Macro Alternative Fund's policy is to recognize a net asset or liability equal to the unrealized gain (loss) on futures contracts. The following table shows additional information regarding the offsetting of assets and liabilities at January 31, 2024 for the Astor Macro Alternative Fund.

Gross Amounts Not Offset in the

Assets:				Consolidated St		
Description	Gross Amounts of Recognized Assets	Gross Amounts Offset in the Consolidated Statement of Assets & Liabilities	Net Amounts of Assets Presented in the Consolidated Statement of Assets & Liabilities	Financial Instruments	Cash Collateral Pledged	Net Amount
Futures Contracts	\$ 108,197	\$ (94,715)	\$ 13,482	\$-	\$-	\$ 13,482
Total	\$ 108,197	\$ (94,715)	\$ 13,482	\$-	\$-	\$ 13,482
<u>Liabilities:</u>	Gross Amounts of Recognized	Gross Amounts Offset in the Consolidated Statement of Assets &	Net Amounts of Liabilities Presented in the Consolidated Statement of Assets &	Financial	Cash Collateral	
Description	Liabilities	Liabilities	Liabilities	Instruments	Received	Net Amount
Futures Contracts	\$ (94,715)	\$ 94,715	\$ -	\$ -	\$ -	\$ -
Total	\$ (94,715)	\$ 94,715	\$ -	\$ -	\$ -	\$ -

**Indemnification** – The Trust indemnifies its officers and trustees for certain liabilities that may arise from the performance of their duties to the Trust. Additionally, in the normal course of business, the Funds enter into contracts that contain a variety of representations and warranties and which provide general indemnities. The Funds' maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet occurred. However, based on experience, the Funds expect the risk of loss due to these warranties and indemnities to be remote.

**Security Loans** - The Astor Dynamic Allocation Fund and the Astor Sector Allocation Fund have entered into a securities lending arrangement with BNP Paribas (the "Borrower"). Under the terms of the agreement, the Funds are authorized to loan securities to the Borrower. In exchange, the Funds receive cash collateral in the amount of at least 102% of the value of the securities loaned. Although risk is mitigated by the collateral, the Funds could experience a delay in recovering their securities and possible loss of income or value if the Borrower fails to return them.

Gain or loss in the fair value of securities loaned that may occur during the term of the loan will be for the account of each Fund. Each Fund has the right under the securities lending agreement to recover the securities from the Borrower on demand. If the fair value of the collateral falls below 102% plus accrued interest of the loaned securities, the lender's agent shall request additional collateral from the Borrower to bring the collateralization back to 102%. Under the terms of the securities lending agreement, each Fund is indemnified for such losses by the security lending agreement. Should the Borrower fail financially, the Funds have the right to repurchase the securities using the collateral in the open market. During the six months ended January 31, 2024, the Fund did not lend out securities.

#### 3. INVESTMENT TRANSACTIONS

For the six months ended January 31, 2024, cost of purchases and proceeds from sales of portfolio securities, other than short-term investments and U.S. government securities, amounted to \$61,766,362 and \$72,981,067 respectively, for Astor Dynamic Allocation Fund, \$11,216,241 and \$13,248,574, respectively, for Astor Sector Allocation Fund, and \$5,926,537 and \$12,659,812, respectively, for the Astor Macro Alternative Fund.

#### 4. INVESTMENT ADVISORY AGREEMENT AND TRANSACTIONS WITH RELATED PARTIES

Astor Investment Management, LLC (the "Advisor") is the Funds' investment advisor. Pursuant to an investment advisory agreement with the Trust, on behalf of the Funds (the "Advisory Agreement"), the Advisor, under the supervision of the Board, oversees the daily operations of the Funds and supervises the performance of administrative and professional services provided by others. As compensation for its services and the related expenses borne by the Advisor, the Advisor receives a management fee, computed and accrued daily and paid monthly, at an annual rate of 0.95% for the Astor Dynamic Allocation Fund and Astor Sector Allocation Fund's average daily net assets and 1.45% of the Astor Macro Alternative Fund's average daily net assets. The Advisor earned \$446,234 \$94,945 and \$98,327 in management fees for the six months ended January 31, 2024 from the Astor Dynamic Allocation Fund, Astor Sector Allocation Fund and Astor Macro Alternative Fund, respectively.

Pursuant to a written contract (the "Waiver Agreement"), the Advisor has agreed, at least until November 30, 2024, to waive a portion of its advisory fee and has agreed to reimburse the Funds for other expenses to the extent necessary so that the total expenses incurred by the Funds (excluding any front-end or contingent deferred loads; brokerage fees and commissions; acquired fund fees and expenses; borrowing costs (such as interest and dividend expense on securities sold short); taxes; and extraordinary expenses, such as litigation expenses (which may include indemnification of Fund officers and Trustees, contractual indemnification of Fund service providers, other than the Advisor) do not exceed 1.40%, 2.15% and 1.15% per annum of the Astor Dynamic Allocation Fund's average daily net assets for Class A, Class C, and Class I shares, respectively, 1.40%, 2.15%, and 1.15% per annum of the Astor Sector Allocation Fund's average daily net assets for Class A and Class I shares, respectively. Prior to November 28, 2022, the expenses for Astor Macro Alternative Fund did not exceed 2.00% and 1.75% for Class A and Class I shares, respectively.

If the Advisor waives any fee or reimburses any expense pursuant to the Waiver Agreement, and any Fund's operating expenses are subsequently lower than their respective expense limitation, the Advisor shall be entitled to reimbursement by the Fund(s). These fee waivers and expense reimbursements are subject to possible recoupment from the Fund(s) in future years (within the three years from the date when the amount is waived or reimbursed) if such recoupment can be achieved within the lesser of the foregoing expense limits or the then-current expense limits. The Board may terminate this expense reimbursement arrangement at any time.

During the six months ended January 31, 2024, the Advisor waived fees or reimbursed expenses of \$118,237, \$107,859, and \$116,094 for the Astor Dynamic Allocation Fund, Astor Sector Allocation Fund, and the Astor Macro Alternative Fund, respectively, pursuant to the Waiver Agreement. As of July 31, 2023 the Advisor has waived/reimbursed expenses that may be recovered no later than July 31 of the year indicated below:

Fund	2024	2025	2026	Total
Astor Dynamic Allocation Fund	\$325,638	\$254,781	\$292,013	\$872,432
Astor Sector Allocation Fund	199,986	191,813	196,196	587,995
Astor Macro Alternative Fund	136,984	152,121	223,888	512,993

The Trust has adopted, on behalf of the Funds, the Trust's Master Distribution and Shareholder Servicing Plans (the "Plans") pursuant to Rule 12b-1 under the 1940 Act with respect to Class A and Class C shares of each Fund. The Plans provide that a monthly service and/or distribution fee is calculated by the Funds at an annual rate of 0.25% of the average daily net assets attributable to such Class A shares and 1.00% of the average daily net assets attributable to Such Class A shares and 1.00% of the average daily net assets attributable to Class C shares and is paid to Northern Lights Distributors, LLC (the "Distributor" or "NLD"), to provide compensation for ongoing distribution-related activities or services and/or maintenance of the Funds' shareholder accounts, not otherwise required to be provided by the Advisor. The Plans are compensation plans, which means that compensation is provided regardless of 12b-1 expenses incurred. The Astor Dynamic Allocation

Fund, Astor Sector Allocation Fund and Astor Macro Alternative Fund incurred \$92,311 \$33,794 and \$589 in 12b-1 fees for the six months ended January 31, 2024, respectively.

The Distributor acts as each Fund's principal underwriter in a continuous public offering of the Funds' Class A, Class C, and Class I shares. For the six months ended January 31, 2024, \$145, \$681 and \$142 were paid to the underwriter for the Astor Dynamic Allocation Fund, Astor Sector Allocation Fund and Astor Macro Alternative Fund, respectively. Of these amounts, \$23, \$109 and \$22 were retained by the Astor Dynamic Allocation Fund and Astor Sector Allocation Fund and pays for these fees for the benefit of the Funds.

In addition, certain affiliates of the Distributor provide services to the Funds as follows:

<u>Ultimus Fund Solutions, LLC ("UFS"</u>), an affiliate of the Distributor, provides administration, fund accounting, and transfer agent services to the Trust. Pursuant to separate servicing agreements with UFS, the Funds pay UFS customary fees for providing administration, fund accounting and transfer agency services to the Funds. Certain officers of the Trust are also officers of UFS and are not paid any fees directly by the Funds for serving in such capacities.

<u>Northern Lights Compliance Services, LLC ("NLCS"</u>), an affiliate of UFS and the Distributor, provides a Chief Compliance Officer to the Trust, as well as related compliance services, pursuant to a consulting agreement between NLCS and the Trust. Under the terms of such agreement, NLCS receives fees from the Funds.

<u>Blu Giant, LLC ("Blu Giant"</u>), an affiliate of UFS and the Distributor, provides EDGAR conversion and filing services as well as print management services for the Funds on an ad-hoc basis. For the provision of these services, Blu Giant receives fees from the Funds.

#### 5. DISTRIBUTIONS TO SHAREHOLDERS AND TAX COMPONENTS OF CAPITAL

The below table represents aggregate cost for federal tax purposes, for the Funds as of January 31, 2024 and differs from market value by net unrealized appreciation/depreciation which consisted of:

			Gro	ss Unrealized	Gros	s Unrealized	Tot	al Unrealized	
Fund	Ag	Aggregate Cost		te Cost Appreciation		Depreciation		Appreciation/Depreciation	
Astor Dynamic Allocation Fund	\$	86,843,995	\$	4,040,169	\$	(84,351)	\$	3,955,818	
Astor Sector Allocation Fund		18,673,236		787,321		(56,058)		731,263	
Astor Macro Alternative Fund		9,958,849		2,496,223		(2,503,454)		(7,231)	

The tax character of distributions paid during the fiscal years ended July 31, 2023 and July 31, 2022 was as follows:

For fiscal year ended July 31, 2023	Ordinary Income		Long-Term Capital Gain		Return of Capital		Total Distribution		
Astor Dynamic Allocation Fund	\$	1,619,362	\$	3,314,770	\$	-	\$	4,934,132	
Astor Sector Allocation Fund		188,844		908,529		-		1,097,373	
Astor Macro Alternative Fund		184,245		-		116,143		300,388	
For fiscal year ended	Ordinary		L	Long-Term		Return of		Total	
July 31, 2022		Income		Capital Gain		Capital		Distribution	
Astor Dynamic Allocation Fund	\$	17,255,306	\$	1,684,904	\$	-	\$	18,940,210	
Astor Sector Allocation Fund		4,057,209		525,087		-		4,582,296	
Astor Macro Alternative Fund		2,812,079		21,879		33,396		2,867,354	

	(	distributed Ordinary Income	dinary Long-Term		Post October Loss and Late Year Loss		Capital Loss Carry Forwards	Boo	Other Book/Tax Differences		Unrealized Appreciation/ (Depreciation)		Total Accumulated Earnings/(Deficits)	
Astor Dynamic Allocation Fund	\$	332,922	\$	-	\$	-	\$ (1,411,572)	\$	-	\$	2,721,781	\$	1,643,131	
Astor Sector Allocation Fund		-		1,325,817		-	-		-		473,660		1,799,477	
Astor Macro Alternative Fund		-		-		-	(1,603,763)		-		154,813		(1,448,950)	

As of July 31, 2023, the components of accumulated earnings on a tax basis were as follows:

The differences between book basis and tax basis undistributed net investment income, accumulated net realized gains, and unrealized appreciation from security transactions are primarily attributable to adjustments for C-corporation return of capital distributions, and the tax deferral of losses on wash sales.

At July 31, 2023, the Funds had capital loss carry forwards for federal income tax purposes available to offset future capital gains as follows:

						CLCF
	S	hort-Term	Lo	ong-Term	Total	UTILIZED
Astor Dynamic Allocation Fund	\$	1,411,572	\$	-	\$ 1,411,572	-
Astor Sector Allocation Fund		-		-	-	-
Astor Macro Alternative Fund		1,386,904		216,859	1,603,763	-

During the fiscal year ended July 31, 2023, Astor Dynamic Allocation Fund and Astor Sector Allocation Fund utilized tax equalization which is the use of earnings and profits distributions to shareholders on redemption of shares as part of the dividends paid deduction for income tax purposes. Permanent book and tax differences, primarily attributable to the tax adjustments for prior year tax returns, the use of tax equalization credits, distributions in excess, and accumulated losses from the Fund's wholly owned subsidiary, resulted in reclassifications for the Funds for the fiscal year ended July 31, 2023, as follows:

	Paid				
	In	Accumulated			
Portfolio	 Capital	Earnings (Losses)			
Astor Dynamic Allocation Fund	\$ 273,771	\$	(273,771)		
Astor Sector Allocation Fund	220,615		(220,615)		
Astor Macro Alternative Fund	(1,188,555)		1,188,555		

#### 6. BENEFICIAL OWNERSHIP

The beneficial ownership, either directly or indirectly, of more than 25% of the voting securities of a Fund creates a presumption of control of the Fund, under Section 2(a)(9) of the 1940 Act. As of January 31, 2024 National Financial Services LLC held 31.13% of the voting securities of the Astor Dynamic Allocation Fund and may be deemed to control the Fund. As of January 31, 2024, National Financial Services LLC held 50.87% of the voting securities of the Astor Macro Alternative Fund and may be deemed to control the Fund.

#### 7. UNDERLYING INVESTMENT IN OTHER INVESTMENT COMPANIES

The Astor Macro Alternative Fund currently seeks to achieve its investment objectives by investing a portion of its assets in the iShares Floating Rate Bond ETF and the iShares Short Treasury Bond ETF (the "iShares ETFs"). The Astor Macro Alternative Fund may redeem its investments from these iShares ETFs at any time if the Advisor determines that it is in the best interest of the Fund and its shareholders to do so.

The performance of the Astor Macro Alternative Fund will be directly affected by the performance of the iShares ETFs. The annual report of the iShares ETFs, along with the report of the independent registered public accounting firm, is included in these iShares ETFs' most recent annual report filed on Form N-CSR available at <u>www.sec.gov</u>. As of January 31, 2024, the percentage of the Astor Macro Alternative Fund's net assets invested in the iShares Floating Rate Bond ETF and the iShares Short Treasury Bond ETF was 29.08% and 28.89%, respectively.

#### 8. SUBSEQUENT EVENTS

Subsequent events after the date of the Statements of Assets and Liabilities have been evaluated through the date the financial statements were issued. Management has determined that no events or transactions occurred requiring adjustment or disclosure in the financial statements.

## The Astor Funds Expense Examples (Unaudited) January 31, 2024

#### Example

As a shareholder of a Fund you will incur two types of costs: (1) transaction costs, including sales loads and redemption fees; and (2) ongoing expenses, such as advisory fees, distribution and service fees (12b-1), and other fund expenses. The following examples are intended to help you understand the ongoing cost (in dollars) of investing in a Fund and to compare these costs with the ongoing costs of investing in other mutual funds. Please note, the expenses shown in the tables are meant to highlight ongoing costs only and do not reflect any transactional costs, such as sales charges (loads), or contingent deferred sales charges on redemptions which may be assessed by mutual funds. This Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period as indicated below.

#### **Actual Expenses**

The columns under the heading entitled "Actual" help you estimate the actual expenses you paid over the period. The "Ending Account Value" shown is derived from each Fund's actual return, and the "Expenses Paid During Period" shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. To estimate the expenses you paid on your account during this period, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the column under the heading entitled "Actual Expenses Paid During Period."

#### Hypothetical Examples for Comparison Purposes

The columns under the heading entitled "Hypothetical" provide information about hypothetical account value and hypothetical expenses based on each Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in each Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs which may be applicable to your account. Therefore, the last column of the table (Hypothetical Expenses Paid During Period) is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

			Actu	al	<b>Hypothetical</b> (5% return before expense		
	Fund's Annualized Expense Ratio	Beginning Account Value 8/1/23	Ending Account Value 1/31/24	Expenses Paid During Period(a)	Ending Account Value 1/31/24	Expenses Paid During Period	
Astor Dynamic Allocation Fund – Class A	1.40%	\$1,000.00	\$ 1,037.40	\$ 7.15	\$1,018.12	\$ 7.08	
Astor Dynamic Allocation Fund – Class C	2.15%	\$1,000.00	\$ 1,033.80	\$ 10.99	\$1,014.33	\$ 10.89	
Astor Dynamic Allocation Fund – Class I	1.15%	\$1,000.00	\$ 1,038.70	\$ 5.88	\$1,019.37	\$ 5.82	
Astor Sector Allocation Fund – Class A	1.40%	\$1,000.00	\$ 1,038.60	\$ 7.15	\$1,018.12	\$ 7.08	
Astor Sector Allocation Fund – Class C	2.15%	\$1,000.00	\$ 1,033.90	\$ 10.99	\$1,014.33	\$ 10.89	
Astor Sector Allocation Fund – Class I	1.15%	\$1,000.00	\$ 1,039.20	\$ 5.88	\$1,019.37	\$ 5.82	
Astor Macro Alternative Fund – Class A	1.90%	\$1,000.00	\$ 1,059.00	\$ 8.52	\$1,015.37	\$ 8.34	
Astor Macro Alternative Fund – Class I	1.65%	\$1,000.00	\$1,060.00	\$ 8.52	\$1,016.86	\$ 8.34	

(a)Actual Expenses Paid During Period are equal to each Fund's annualized expense ratio, multiplied by the average account value over the period, multiplied by 184 days and divided by 366.
